FOR IMMEDIATE RELEASE

NEW LARGER WRIST-ASSIST!

Mount Dora, FL – March 22, 2010 – R.S. Innovations, LLC, is introducing a wrist-assist tool with a larger cushion. Developed to accommodate technicians with larger hands or give an added boost. The wrist and hand support tool elevates and holds clients hand and arm reducing technician strain. It can be used horizontally or vertically to achieve desired support height. Used horizontally, the cushion moves with the clients' wrists for optimum placement and flexibility at a height of 2 ¼ inches. A 6 ½ inch high hand support is achieved by standing the tool vertically and resting clients' palm over the disc end portion. This unique design improves technician's posture and relieves muscle fatigue.

The wrist-assist was developed to ease repetitive strain issues associated with the working environment of the nail industry. More information on the wrist-assist can be found at www.wrist-assist.com .
